

We do everything possible to provide quality plants for you at pick-up. Plants become your property upon pick-up. Due to conditions beyond our control we cannot guarantee survival or provide a refund after plants are picked-up. Double check your order at the front table.

Thank you for your order.

Deciduous

Sugar Maple – 6-12" seedlings, can grow to 75'. It does not do well in wet areas. Native, provides products from sap in the spring.

Black Cherry – 12-18" seedlings, can grow to 70', extremely valuable timber tree, also good for wildlife. Best in rich, moist, soils.

White Oak – 12-18" seedlings, can grow to 90'. Will grow in wet areas, best in rich loamy soils, full sun. Resistant to ice breakage and oak wilt.

Evergreens

Norway Spruce – (4-0) 7-24" seedlings, can grow to 150', 6' in 6-7 years. Good for Christmas trees, timber and windbreaks. Thrives in ordinary soils: needs good moisture to keep green color. Space 6' apart.

Concolor Fir – (3-0) 5-10" seedlings, can grow to 100'. Easy to care for. Very good as Christmas trees. Needs good drainage.

Eastern White Pine – (3-0) 5-10" seedlings, can grow to 50 ft., extremely hardy, will grow in moist soils and well drained, tolerates heat and drought. It will grow where many others will not.

Semi-Dwarf Trees

Two year tree pruned to a 5/8" to 3/4" branch, 4'-6' high
Most require two different varieties for proper pollination.

Apple Trees

Northern Spy – Crisp, tender all-purpose. Blooms late, avoiding most late spring frosts. Ripens in late October. Superior winter apple.

Gala – Sweet, crisp yellow skin. Ripens in August. Good for eating and salads.

McIntosh – Skin is intense red, with almost a touch of purple over a green base with touches of gold; taste is bold, sweet-sour, and somewhat acidic; texture is soft, with very aromatic flesh. Bloom time mid-season with bloom color white. Diploid which requires another variety to pollinate. Ripens late season, October (South Central PA).

Smokehouse – Yellow firm skin, crisp, spicy aromatic flavor. Ripens in September. Good for eating, salads, pies and sauce.

Cortland - Heavy-bearing, ruby red, very crispy, great in toss salads. Great for pies and cider. Ripens in mid-September.

Peaches

5/8" to 3/4" 5'-6' high

Most require two different varieties for proper pollination
Maturity at 10-12 ft.

Sunhigh – Fruit is large, freestone, exceptional quality. Good for canning and freezing.

Loring – A large, firm, yellow fleshed freestone with attractive red color over a yellow ground color. Good for canning and freezing. The trees are vigorous, productive and resistant to bacterial spot.

Quince

5/8" to 3/4"

A pome fruit, similar in appearance to a pear, and bright and golden-yellow when mature.

Blueberry Bushes

Thrive almost anywhere in acid soil; in alkaline soils, add aluminum sulfate. Plant two different varieties for best results. Like full sun.

2-3 year, 12" – 18"

Earlieblue – Large, light blue and firm berries which ripen uniformly in tight clusters. Berries resistant to cracking. Mild sweet flavor. Plants grow upright and have good cold tolerance.

Duke - Known for extremely large fruit, ripens Mid-July.

Raspberries

Heritage - Everbearing and produce large firm excellent quality fruit. Start ripening early July.

Blackhawk - large, glossy, firm berries that are excellent for cooking due to their resistance to crumbling. Blackhawk also has good disease resistance and heat tolerance.

Blackberries

Navaho - first erect freestanding thornless blackberry, sweeter than the other thornless varieties. Can attain a height of 5-6 feet, but should be kept pruned down to 4 feet high. Resistant to anthracnose. Plants are cold hardy down to 10 F.

Strawberries

Seascape – Everbearing and cold hardy.

Native/Wildlife/Stream Enhancement

Sawtooth Oak – 12-18" seedlings. Fast growth to 70 feet. Tolerates most soils. Space 20 feet apart for best acorn production. Should produce within 7-10 years. Excellent for WILDLIFE.

Red Bud - 12-18" seedlings, Flowers are perfect reddish purple in bud opening to a rosy pink with purplish tinge in early spring. Very effective as a mass planting. Leaves 3-5 inches long and wide.

Black Chokeberry – 12-18" seedlings. Height 3 to 5 feet. Spread 10 feet. Native to eastern United States. Single white flowers in late May. Purplish-black berries in fall. Fall color wine red. Good for naturalizing, a fast screen, food for wildlife. Very adaptable species will grow on dry sandy hillsides. Good wetland plant.

Sargent Crabapple – (3-0) 12-24" seedlings. Small shrub like tree grows 8-10 feet in height with a wide mounding top. Spread 8-15 feet. Small dark red crabapples appear in fall before the leaves drop. Food for songbirds and wildlife.

American Elderberry – 12-18" seedlings. – Root Stock. It is a fast-growing shrub, grown for its clusters of bluish-black berries, which appear in late summer. It is great for jams and for wildlife.

Silky Dogwood – (2-0) 12-26" seedlings. A good plant for stream banks. Grows up to 9ft tall. Red barked twigs in winter. Spring pruning will force young shoot growth.

Shagbark Hickory - 8-16" seedlings Narrow, upright growth habit. Height to 90 feet. Fall colors are yellow and golden-brown tones. Popular for its sweet edible nuts and shredding bark. Nut production should start in 25 -30 years. Plant at least ten for pollination.

Black Alder – 12-18" seedlings. Recommended for soil conservation purposes. Fast growing on different soil types, good wildlife habitat.

Northeast Perennial & Annual Wildflower Mix

1% Common yarrow; Bishop's Flower; 1% Butterfly Milkweed; 11% Smooth Blue Aster; Blue False Indigo; 3% Cornflower; 2% Wallflower; 2% Oxeye Daisy; 2% Shasta Daisy; Clarkia; 6% Lanceleaf Coreopsis; Plains Coreopsis; 10% Cosmos; 4% Rocket Larkspur; 4% Sweetwilliam; 7% Purple Coneflower; 2% California Poppy; 2% Mistflower; 5% Perennial Gaillardia; 2% Annual Baby's Breath; 2% Tree Mallow; 1% Marsh Blazing Star; 6% Scarlet Flax; Sweet Alyssum; 5% Bigleaf Lupine; Wild Bergamot; 1% Corn Poppy/Shirley Mix; 2% Red Prairie Coneflower; Clasp Coneflower; 1% Orange Coneflower; 5% Blackeyed Susan; Catchfly; 3% Crimson Clover.

Number of 2 Year Fertilizer Tablets per Size Plant

1 Tablet - All seedlings, transplants

2 Tablets – Container grown plants, roses

1 Tablet – For each ½ inch trunk diameter, large trees & evergreens

Tablets are 10 grams each, 20% Nitrogen, 10% Phosphoric Acid, 5% Potash.

TABLETS SHOULD NOT TOUCH ROOTS.
