

We do everything possible to provide quality plants for you at pick-up. Plants become your property upon pick-up. Due to conditions beyond our control we cannot guarantee survival or provide a refund after plants are picked-up. Double check your order at the front table.

**Thank you for your order.**

### Deciduous

**Sugar Maple** – 6-12" seedlings, can grow to 75'. It does not do well in wet areas. Native, provides products from sap in the spring.

**Red Oak** – 18-24" seedlings, can grow to 75', fast growing, red to red brown leaves in Autumn.

**Black Walnut** – 18-24" seedlings, can grow 50+', native and known for edible nuts and wood.

### Evergreens

**Norway Spruce** – (2-0) 5-10" seedlings, can grow to 150', Good for Christmas trees, timber and windbreaks. Thrives in ordinary soils: needs good moisture to keep green color. Space 6' apart.

**Fraser Fir** – (2-0) 4-8" seedlings, good for ornamentals and Christmas trees. Cool soils and north exposure.

**Canadian Hemlock** – (2-0) 4-8" seedlings, grows well in variety of soils. Plant in part shade but sun and full shade will work. Like moisture. Excellent for hedges.

### Semi-Dwarf Trees

Two-year tree pruned to a 1 1/16" to 7/8" branch, 5' high. Most require two different varieties for proper pollination.

### Apple Trees

**Northern Spy** – Crisp, tender all-purpose. Blooms late, avoiding most late spring frosts. Ripens in late October. Superior winter apple.

**Liberty** – Very hardy, good dessert apple.

**Empire** – A good eating apply. Keeps well when refrigerated. A hardy productive tree.

**Granny Smith** – Green firm crisp flesh. Long storage life. Good baking apple.

**Fuji** - Reddish green fruit, flavorful, crunchy, juicy white flesh. Excellent storage life. Ripens in late September to early October.

### Cherry Trees

1 1/16" to 7/8" 5' high  
Maturity at 10-12 ft.

**Black Tart** – Very large, black sweet cherries. Ripens mid June.

**Lapins** – Ripens in late June. Dark red/black sweet cherry with firm flavorful flesh. Self-pollinating.

### Blueberry Bushes

Thrive almost anywhere in acid soil; in alkaline soils, add aluminum sulfate. Plant two different varieties for best results. Like full sun.  
3 year, 12" – 18"

**Berkeley** – Ripen mid-season. Very large sweet berries.

**Jersey** – Ripen late. Grows vigorously, large fruit.

### Grapes

**Canadice** – Seedless, Red, extra hardy.

**Concord** – Seedless, Blue.

### Strawberries

**Seascape** – Everbearing and cold hardy. Large, firm and flavorful berries.

### Currants

**Red Lake** – Produce clusters of red berries that are good for eating, jams and jellies. Ripen in mid-July.

### Native/Wildlife/Stream Enhancement

**Sawtooth Oak** – 6-12" seedlings. Fast growth to 50 feet. Tolerates most soils. Space 20 feet apart for best acorn production. Should produce within 7-10 years. Excellent for WILDLIFE.

**Hackberry** – 12-18" seedlings. Excellent wildlife plant. Dark berries and growing to 40ft. Tolerates adverse conditions.

**White Flowering Dogwood** – 18-24" seedlings, creamy white flowers, produce white berries. Tolerates dry or moist soils, shady or sun.

**Button Bush** – 12-18" seedlings. Thrives in wet and low lying areas. Blooms July/August cream colored flowers develop into nutlet type fruits that last into winter.

**Black Chokeberry** - 12-18" seedlings. Height 3 to 5 feet. Spread 10 feet. Native to eastern United States. Single white flowers in late May. Purplish-black berries in fall. Fall color wine red. Good for naturalizing, a fast screen, food for wildlife. Very adaptable species will grow on dry sandy hillsides. Good wetland plant.

**American Elderberry** – 3-4' seedlings. – Root Stock. It is a fast-growing shrub, grown for its clusters of bluish-black berries, which appear in late summer. It is great for jams and for wildlife.

**Streamco Willow** – 2-3ft cut backs. Grows 12-15 Feet. Dark blue-green leaves with light gray/olive gray stems. Likes cleared, moist soil along stream banks. Disease and insect resistant.
