Hannah Eck

Resource Conservation Technician

Sullivan County Conservation District

3/5/2026

Hello all,

I wanted to thank you again for attending the Hottenstein Project Site showing yesterday. I wanted to make sure you all got a copy of the questions asked during the showing. There was also a small change order per the engineer; I have updated all documents on the website and ask you to please use the updated versions while submitting bids and/or referencing documents.

Answers for the questions asked at site showing:

- Waterers will be on the contractor to provide and install; the waterers are to be frost free Mirafont model 3465 double waterer equivalent.
- Animal access gates are on the contractor, any other gates not specified are responsibilities of the landowner and/or SCCD.
- Fencing is responsibilities of the landowner and the Sullivan County Conservation District.
- Gutters on the existing building and the new building are responsibilities of the contractor.
- There was a typo in the concrete/construction bid packet where it includes stone fill and gravel under the concrete/construction bid. The change order addresses this, and updated bid sheets show correct responsibilities of each contract.

If you have any other questions about the bid information, please email me, heck@sullivancountypa.gov or call the office at 570 928-7057. Questions regarding engineering or design plans can be directed to John Coleman, jcolemaneng@gmail.com.

Thanks again
